

Our Product **MOUNT10 SOLO** provides a highly efficient and automatic way to backup your data. We provide a client software to you which can be flexibly configured to your needs. This client runs continuously in the background, creates regular backups of your selected data, encrypts and transfers the changes into our SWISS FORT KNOX.

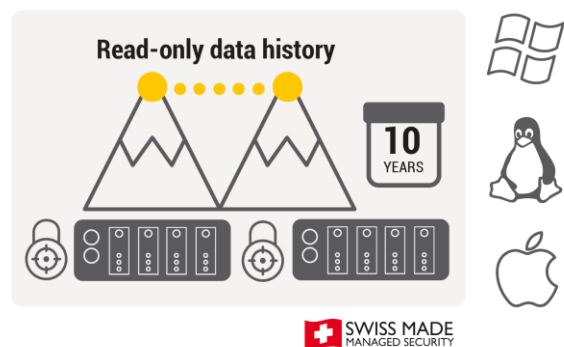

The transferred data are highly encrypted and cannot be altered anymore (read-only). The history of your data is 12 month. The history is included in the service.

With MOUNT10 SOLO, you do not need to purchase any additional software, the backup-software is part of the service and is available for Windows and MAC platforms.

Customer On-Premises Infrastructure

MOUNT10 Infrastructure

Concept

With the installation credentials, you'll receive from us, you can establish a connection to our storage platform in the SFK. You will be asked to create an Encryption-Key responsible for the encryption of your data. Without this Encryption-Key, recovery of your data will be impossible. Not even MOUNT10 can recreate or regenerate this key! As a next step, you chose the data you would like to be backed up, the frequency of the backups and the desired point in time to execute this process.

SOLO works like a local backup, but will transfer the encrypted data to SWISS FORT KNOX I and II, so your data is stored in 2 external locations, highly encrypted and secure in Switzerland.

Functionalities and advantages

- **SWISS FORT KNOX I + II:** Encrypted & **redundant** storage in the most secure datacentres of Europe. Your data is exclusively stored in Switzerland, guaranteed!
- **Usual MOUNT10 service:** Our system checks your backup on a daily basis & contact you if you exceed your selected data or it recognizes an interrupt in the process.
- **Read-Only, malware protection:** The transferred data are highly encrypted and cannot be altered anymore.
- **Simple:** With our software client, you can do it all, select your data, backup this selection and restore all your data when you need it.
- **End-to-End encryption:** Your data will be encrypted directly on your environment with AES 256-bit before it leaves your infrastructure. The encryption has no negative impact regarding the backup performance.
Important: No one else except you can read your data.
- **Recovery and disaster option:** A small or medium data volume can be restored easily over the internet through your client software. Optionally we offer an express delivery of your larger data volumes on external Hardware devices (USB/NAS).
- **Service Operation Center SOC:** A team of certified technicians is available for support, free of charge and 24/7.
- MOUNT10 SOLO is designed for PC's and Laptops/Notebooks
- 1 GB available as of CHF 9.- per month. Your advantage is, we bill you only on the selected amount of data and not the whole space your history occupies!
- With your login on the customer self-service portal, you may change the scaling of the service as well as the preferred method of payment.
